

# USGS-NASA Landsat Science Team Winter Meeting

January 12-14, 2016

# Meeting Objectives

- Identify the priorities and approaches needed to improve the global Landsat/moderate resolution record
- Review the status of Landsat 7-8 and the Landsat archive.
- Review Virginia Tech remote sensing activities.

# Priorities and approaches for improving the global Landsat/moderate resolution record

- Four topics:
  1. Landsat product improvements, collection concepts
  2. Landsat surface reflectance: improving consistency
  3. Landsat “analysis ready” data
  4. Sentinel-2/Landsat synergy
  5. Landsat MSS: using the full Landsat record
- Desired outcomes
  - Evaluation of the relative merits of each activity
  - Assessment of the general soundness of plans.
  - Team consensus on relative priorities
